parminder.singh629@gmail.com

With a total of over 2+ years as a dedicated software engineer, I am committed to constant learning to further enhance and sharpen my analytical and technical skills. I am dedicated to leveraging my expertise for the growth and success of the organization.

## EXPERIENCE

### Futurionic, Gurugram — Software Developer

September 2022 - TILL PRESENT

- Experienced in React.js and TypeScript with a focus on functional components
- Competent in JavaScript (ECMAScript), Axios, routing, NPM, local storage, and styles along with developing a custom reusable React component library.
- Skilled in Express.js, Node.js, and Sequelize for server-side development and various databases like PostgreSQL, MongoDB, etc.
- Familiar with Context API, navigation, hooks, Redux, Third Party API integrations and other React concepts.
- Proficient in using Git Bash and GitHub Desktop for version control
- Involved in designing and developing a range of client and in-house applications, streamlining internal processes and enhancing team productivity.
- Effectively managed a team of 6, ensuring project goals were met on schedule and within scope.
- Acted as a point of contact for multiple clients, facilitating clear and open communication, understanding client requirements, and managing client expectations.
- Worked closely with project planning and execution.
- Provided training to 3 employees, to foster skill growth and professional development within the team for React JS and Nodejs.
- Conducted technical interviews to assess candidates and build a skilled team, contributing to the company's overall growth and technical expertise
- Actively participated in code reviews for fellow developers, ensuring code quality, best practices, and knowledge sharing within the team

## SKILLS

- HTML
- JavaScript
- CSS
- ReduxToolkit
- Tailwindcss
- MaterialUI
- Typescript
- sequelize
- JSP
- Servlet
- RDBMS
- MySQL
- Node.js
- Express.js
- Core Java
- Spring Boot
- Hibernate
- Next.js
- No SQL

## HOBBIES

Football, Cricket, Watching  
Movies, Explore new technologies

## Iedeas, Agra — Associate Software Engineer

August 2021 - September 2022

- Worked on web design which includes HTML , Java Script , CSS
- Hands on Experience with React.js and Typescript
- Good understanding of Functional Components
- Hands on experience on Spring boot, MVC, Hibernate, Express.js, Node.js
- Good understanding of working with different Databases such as MySQL, MongoDB , etc
- Good understanding of Context Api, Navigation , Hooks etc
- Javascript(ECMAScript), Axios , Routing , Npm, Localstorage, Stylesheets and so on
- Created Custom Reusable React Components Library.
- Hands-on experience of writing unit test cases on Jest and Mockito
- Good understanding of using Git bash & Github desktop

## PROJECTS

### Creditghar:

AUG 2023 - TILL PRESENT

- Implemented Role Based Authentication and Authorization in Frontend and Backend
- Implemented Chart.js for Analytics.
- Work Closely with deployment Team on Azure for frontend and backend deployment .
- Optimizing Frontend and Backend.

**Environment:** React.js , TailwindCSS , Node.js and PostgreSQL

### GCC:

OCT 2022 - TILL PRESENT

- Implemented **React Hook form** and Implemented chat using firebase RealTime database.
- Implemented **Leaflet Map** for getting geolocation and show distance between two location.
- Implemented **Translation** using **i18n**.
- Maintaining and optimization of Frontend.

**Environment:** React.js & Material UI

### mtrack:

SEP 2022 - TILL PRESENT

- Create leave, attendance, job , policy modules in node.js using express as framework and sequelize.
- Maintaining Backend.

**Environment:** React.js, Tailwindcss, Node.js , Sequelize & Postgres.

### Iedeas.com:

OCT 2021 - DEC 2021

- Basically designed and maintained the company website on **Next.js (TypeScripts)**
- Learned to work on **Figma** and with **Material ui**
- Implemented **React hook** form and **Send-grid** Api for receiving mail from users.
- Good understanding about **Google maps** and added iFrame for **Location** on website
- Implemented **Themes** for the website
- Implemented **Translation** using **i18next**
- Created and wrote test Cases on **Next.Js** using **Jest library**

**Environment:**Nextjs , Typescript, MaterialUI.

## **Checklistgurus.com:**

DEC 2021 - TILL PRESENT

- Project is based on **React.js & Material UI**.
- Designed on **Figma**.
- Used **TypeScripts** to create Forked Component (Checkbox Tree view Structure).
- API creation on Spring Boot using MySql db
- Created and wrote test Cases on Spring Boot using Mockito Backend
- Created and wrote test Cases on Spring Boot using Jest for Frontend.
- Maintaining Frontend and Backend
- 

**Environment:** Reactjs , Typescript, MaterialUI ,SpringBoot,JPA and MySQL.

## **TechBlog:**

Personal Project( June 2021)

- Created a blog using Java Servlet and JSP for view
- Bootstrap for Styling(CSS)
- MS- SQL used for fetching and storing data
- Javascript to fetch and save data over the server

## **EDUCATION**

**NIIT**, Agra — PGP in Full Stack Software Engineering

03/2022

**DSIM**, Delhi — Masters in Digital Marketing

06/2020

**MSC**, Agra — Physics

08/2015

**BSC**, Agra — PCM

06/2011

**Intermediate (10+2)**, CBSE, Agra — PCM

06/2008

**High School**, CBSE, Agra

06/2006
